### DETAILED ACTION

1. Receipt is acknowledged of the Amendment filed 7 April 13, 2004.
2. Applicant's arguments see page 15, filed 7 April 13, 2004, with respect to Yee's reference and the amended claim 26 have been fully considered and are persuasive.

### *Allowable Subject Matter*

3. Claims 1-30 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Yee discloses a system having a network server for linking with a network database; a user computer having a browser interface (a device which used by the user to issue a search command). The browser interface is for inputting an analysis time node (inputting a search parameter or a search criterion that retrieves the data in date order or sorting the retrieved record in time order) and displaying data retrieved by from the network server from the network database according to the analysis time node.

Applicant admits that, in a manufacturing system, a database including batches of rework production data is generally known.

One of ordinary skill in the art would not have been motivated to modify the teachings of Yee in order to provide a lithography rework analysis system having a network database linked with the machine groups for storing initial data and batches of rework data of the machine groups, and the network server process data stored in the network database with a browser interface for inputting an analysis time node and the retrieving and display the network database of the analysis time node with the user computer, as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
